EDUCATION

Temple University | Philadelphia, PA

August 2022 - Spring 2026

B.S. in Computer Science, Minor in Sports Management

TECHNICAL SKILLS

Languages: Java, Python (Pandas, Matplotlib, Plotly, Pytest), TypeScript, JavaScript, C, HTML/CSS

Tools/DevOps: Github, Docker, VS Code, IntelliJ, Eclipse

Frameworks/Libraries: React, Next.js, Node.js, Linux, Streamlit, PyTorch, D3.js, Numpy, Folium

RELEVANT EXPERIENCE

TPNI/Building Agents | Remote

March 2026 - Present

Software Engineering & AI Solutions Intern

- Collaborate on the development, debugging, and enhancement of AI-powered business applications and automation tools
- Assist in building and improving internal software solutions tailored to client workflows and operational needs
- Work with developers to troubleshoot issues, test features, and improve application functionality and user experience
- Contribute to product development discussions involving custom software, workflow automation, pricing tools, and sales training platforms
- Create LinkedIn posts, newsletters, and outreach content communicating AI and automation solutions to business audiences
- Translate technical concepts into clear, business-friendly messaging for non-technical stakeholders

OWLHacks Hackathon | Philadelphia, PA

September 2023

Participant & Award Winner (Best Beginner Hack)

- Collaborated in a team to design and develop a working technical prototype within 24 hours.
- Pitched solution to judges and industry mentors.
- Awarded Best Beginner Hack among competing teams.

PROJECTS

gMatch| *Next.js, React, JavaScript, NextAuth, Vercel, Github*

Spring 2026

- Contributed to a team web application that helps students form project groups based on availability, preferences, and survey responses.
- Improved frontend user experience through survey layout updates, form validation, dashboard navigation, and availability grid functionality.
- Used GitHub branches, pull requests, and Vercel preview deployments to support a collaborative software development workflow.

Keep Philly Safe and Aware| OwlHacks

September 2023

- Engineered an interactive web application using Python and Streamlit to visualize crime data and statistics to improve safety awareness for Philadelphia residents.
- Utilized Leaflet and Folium to display crime data on an interactive map with a safety-score feature.
- Presented the project and won an award at Temple University's OwlHacks 2023 Hackathon.

CERTIFICATIONS

Generative AI for Software Development — May 2026

Introduction to Zero Trust (LFS183) — The Linux Foundation

ACTIVITIES

Association for Computing Machinery for Women (ACM-W)| Member

August 2022 - May 2025
